 - Connectedness Survey

➤ As a staff we are very interested in the students that are not connected to any adults in this school. Why are they not connected to any adults? This is one of the divisional goals.

➤ It is important to be consistent and have a clear definition of what connection looks like here at school. During a staff meeting as teachers we created a shared definition of connectedness. It was vital that this definition be written in kid-friendly language. Our shared interpretation of connectedness is:

You are connected to someone if (as a student here at LCPS) you feel that:

- You matter to them
- They care about you
- You could go to them for help with a problem

➤ A suggestion was brought forward to add custodians to the questionnaire. Custodians play a vital role in the school and it would be important to know how they connect with them.

➤ It would be good to see if there was a connection between those students that do not have connection with staff and those students that are getting in trouble with chromebooks.
